Comments:

Harlow has been administered a vaccination for the **core diseases (C3)**: Distemper, Hepatitis and Parvovirus and **non-core disease (KC)**: Kennel Cough (caused by *Bordetella bronchiseptica*, Parainfluenza and adenovirus type 2) for her annual vaccination. It is important to realise that Harlow may still catch "Kennel Cough" from other causes not covered by this vaccination. To maintain protective immunity, Harlow should receive C3 boosters at least every 3 years and KC boosters every year. A titre test in 3 years can be done to confirm if a C3 booster is required.
